PLEASE KEEP THESE INSTRUCTIONS

Every Zest product is unique because each piece of timber has its own distinctive, natural features

Zest is a leading timber specialist, designing and manufacturing award winning wooden garden products, crafted from natural slow-grown European redwood. Unlike man-made materials, timber is an entirely natural material, and each piece has its own distinctive qualities. So, owning a Zest timber product is like enjoying a unique slice of nature.

The benefits of slow grown timber:

“Trees grow slowly in the cold climate of Eastern Europe producing stronger and close grained timber ideal for making quality outdoor products.”

Natural and Unique

There may be variations in the timber's colour or shading, but these will fade away over time when exposed to sunlight.

The changing seasons in each year of growth create characteristics unique to each tree - and to every piece of timber. Branches create an embedded mark in the tree trunk, resulting in a knot. Knots are a unique and natural feature which tells the story of the tree.

Owing to timber's natural moisture content, variations in temperature and humidity can cause expansion and contraction and may result in cracks and splits in any product made from natural timber. Any cracks and splits in the timber grain will alter with the changing seasons. They do not compromise the strength and durability of the product - they just add to its unique character.

Most Zest products are pressure treated which protects the timber from rot for many years. Pressure treatment can result in a small amount of 'green spotting' on the surface of new timber caused by natural salts leaving the wood. This will fade away over time.

These visible changes are not a fault or a cause for concern and do not affect the structural integrity of the product. They are a result of how the timber matures and responds to its natural environment.

Ethically Sourced

Zest's slow grown European redwood is sourced from responsibly managed PEFC certified forests. This means forests are used in a way that maintains biodiversity, regeneration, and nature conservation. PEFC tracks certified timber from the forest to the final product giving complete confidence to the customer. www.pefc.co.uk

Replanting

Zest with its main supply partners is dedicated to replanting woodland and is collaborating on the nurture of wildlife habitats.

Advisory Notices

- Roofs are weather resistant and not guaranteed to be watertight unless otherwise stated.
- Items with enclosed storage or cupboard space are weather resistant and are not watertight unless otherwise stated.
- Be aware of trap hazards if a Zest product has moving parts.
- All products should be positioned on solid, level ground
- Anchor down products where applicable using appropriate fixings.
- Roofs are not weight bearing
- Sanitise all catering surfaces prior to use.

Emily Chair Assembly Instructions

Requires 2 person assembly.

Tools required: Hex/Allen Key, Flat/Slotted Screw Driver, 10mm Spanner.

Please take a few moments to check all pack contents listed

Emily Chair Pack List			
Code	Item	Description	Quantity
09033	A	Seat Assembly	1
28230	B	Side Assembly	2
09035	C	Back Assembly	1

10095 - Emily Chair Fixings List		
Item	Description	Quantity
1	105mm Bolt	8
2	10mm Nuts	4
3	Washers	4
4	Cross Dowel	4

This product is made from pressure-treated timber. It should not be painted or coated with any other treatment until at least 6 months after purchase

1

Position Seat Assembly A between Side Assemblies B as shown in Fig. 1a. Align bolt holes and attach using 4no 105mm Bolts with Washers and Nuts as shown in Fig.1b.

Do not fully tighten at this stage.

2

Insert 4no Cross Dowels into 10 mm holes to rear of Back Assembly (C) ensuring slots face outwards (as shown in Fig 2a). Position the Back Assembly between side assemblies (Fig 2b) and insert 2no bolts per side and carefully thread bolts into cross dowels, (Figs 2c & 2d).

Fully tighten all Bolts at this stage.

Your Emily Chair is now complete.
